IT'S THRILL TIME CHAMPIONSHIP
"Double Figure 8 Races"
RAIN or SHINE
smashing crashing

JM Motorsport Productions developed this form of action racing by using compact cars to enhance excitement for both drivers and spectators. Utilizing smaller, lightweight cars takes on all the excitement of a full-sized Figure "8" without likely danger to the drivers. Speeds average between 5 and 15 miles an hour and only 5 to 8 cars are allowed at a time. Unlike the traditional brute-force demo, in this event it is your ability to **out-think** and **out-manuever** the other driver that makes you the **WINNER!** Because of its challenge, drivers all over are switching to **FIGURE 8 RACING**. With strict guidelines/rules and the help of the drivers, we have made this race fun and fair for all!

WORLD’S LARGEST DEMOLITION DERBY

2016 JEFFERSON COUNTY FAIR - INSIDE FUEL TANK OPTION for 4, 6 and 8 cylinder cars.

JMMP has recommended stock fuel tanks for over 40 years, based on our experience of overall safety. (ALL NASCAR DIVISIONS HAVE OUTSIDE FUEL TANKS)

An alternate fuel tank **MAY** be installed with the following provisions adhered to:

- a) The stock fuel tank must be removed from the car if you are installing an inside tank.
- b) The car must use an approved type of portable fuel tank. A fuel tank used with outboard marine engines is acceptable.
- c) No stock tanks will be permitted inside the car. If you have a plastic marine tank, it must be placed in a solid steel case!
- d) The tank must be mounted on a solid, flat surface located in the center of the vehicle. Tank must be reinforced, providing its not reinforcing any other part of the car. In other words build a cage that does not mount to the frame, sides or rear of the vehicle. Bracing is permitted 2 feet back from the driver’s seat/middle of the back seat area.
- e) The tank must be securely mounted to the car body by at least two steel straps. NO rubber tie-downs permitted!
- f) The mounted fuel outlet fitting on the marine tank cannot be changed. No splicing of gas line inside vehicle, must be a solid line running from the tank to front of firewall. No inline fuel filters inside the drivers compartment.
- g) The tank will not be allowed if fuel runs out when the outlet line is disconnected or when the tank is inverted.
- h) If any gas is spilled in your car, it will not be permitted to run.
- i) The fuel line may run under the floor pan to the fuel pump by using your original gas line or a new rubber hose, each end must be double clamped, if inside must be inside metal conduit.
- j) Fuel pump must be located inside the fuel tank, under the vehicle or hood. All electric fuel pumps must shut off with ignition switch located within reach of the driver and painted white.
- k) No more than 3 gallons of gas is permitted or see fuel quantity on rule sheet.

JM Motorsport Productions does not imply or guarantee safety. We believe that when a gas tank leaks fuel or fumes, it is safer for them to leak on the track rather than in the car.
“SEE RULE 22 ON STOCK RULE SHEET FOR STOCK TANKS IN STOCK POSITION”
