"STATEWIDE CHAMPIONSHIP DEMOLITION DERBY" 2016 ERIE COUNTY FAIR INSIDE FUEL TANK OPTION for 6 AND 8 CYLINDER CARS ONLY.

4 CYL COMPACTS MUST RUN STOCK TANK IN STOCK POSITION

JMMP has recommended stock fuel tanks for over 40 years, based on our experience of overall safety.
(ALL NASCAR DIVISIONS HAVE OUTSIDE FUEL TANKS)

An alternate fuel tank **MAY** be installed with the following provisions adhered to:

- a) The stock fuel tank must be removed from the car if you are installing an inside tank.
- b) All vehicles will be required to have a fire extinguisher inside the driver's compartment within reach of the driver.
- c) The car must use an approved type of portable fuel tank. A fuel tank used with outboard marine engines is acceptable.
- d) No stock tanks will be permitted inside the car. If you have a plastic marine tank, it must be placed in a solid steel case!
- e) The tank must be mounted on a solid, flat surface located in the **CENTER** of the rear seat area. Tank must be reinforced, providing its not reinforcing any other part of the car. In other words you may build a cage that does not mount to the frame, sides or rear of the vehicle. Bracing is permitted 2 feet back from the driver's seat or tank maybe mounted **IN THE TRUNK OVER THE HUMP** on a solid, flat surface located directly above the rear axle.
- f) The tank must be securely mounted to the car body by at least two steel straps. **NO** rubber tie-downs permitted!
- g) The mounted fuel outlet fitting on the marine tank cannot be changed.
- h) No inline fuel pumps, filters, connectors or splitting of line inside the drivers compartment.
- i) The tank will not be allowed if fuel runs out when the outlet line is disconnected or when the tank is inverted.
- j) If any gas is spilled in your car, it will not be permitted to run.
- k) The fuel line may run under the floor pan to the fuel pump by using your original gas line or a new rubber hose, each end must be double clamped. If fuel line is inside it must be inside metal conduit or a metal line.
- l) Fuel pump must shut off with ignition switch painted white, fuel pump must be located inside fuel tank or under vehicle/hood.
- m) No more than 3 gallons of gas is permitted.
- n) If your tank is in the trunk over the rear hump, the rear seat cushion support brackets and all areas designated with an "X" in diagram 2 (below) must be covered with sheet metal or aluminum (firewall) to minimize fumes from entering the driver's compartment from the trunk area.

JM Motorsport Productions does not imply or guarantee safety. We believe that when a gas tank leaks fuel or fumes, it is safer for them to leak on the track rather than in the car.
